about us

Enterprising co-founder and Managing Director, John Fearon established the organisation, financing the business in 1982 with his own personal funds. With values and a purpose that still remain the 'soul' of the company, Eclipse Lighting and Sound have just celebrated their 25th Anniversary.

Now an established Leisure industry leader, the company have worked on a range of projects from small one-off developments through to multi-million pound nightclubs, cruise ships, cinemas and many other establishments. Innovative designs and competitive pricing - with the focus remaining on the clients needs - has been paramount to the growth and popularity of the company.

Over the last few decades Eclipse Lighting and Sound have seen a variety of changes through a number of industries and have been very fortunate to work with some great operators. As a result the company has retained the same clients for over a decade.

Priding itself in learning from previous experiences, the company utilises the support of some of the industry's most respected suppliers and distributors. The company has preferred supplier status from distributors such as Martin Professional and others.

Good management, a very dedicated team of engineers and high class support staff have added to the success of the business, enabling them to work quickly and accurately. Standing by the motto 'any good manager is only as good as the team they work with'; the Directors agree the success is due to an expert network of dedicated employees, both in the field and the administrative centre. This relationship is the backbone of this flourishing organisation.

The future includes a brand new state-of-the-art showroom and offices in Dubai opening in November 2008. A similar expansion into the Caribbean is completed in 2009.

The longevity of the company has attracted audiences further afield as Eclipse Lighting and Sound now expand their expertise and their portfolio of clients. Recent installations include venues in:

- » Dubai
- » Italy
- » France
- » Caribbean

Eclipse Lighting and Sound is not only a dynamic partnership: it's a company that maintains a keen commitment to its clients and the industries it serves. This commitment, combined with the planned expansion, promises to offer competitive advantages to both new and existing clients.

hire division

Eclipse Lighting and Sound established the Hire Division in 2007. Incorporating anything from a one off hire of a Plasma to a full Audio Visual System. With more than 25 years experience, you are offered a one-stop shop for all your audio-visual requirements. Installation teams operate throughout the UK.

A lot of the work is repeat business or recommendations, which reflects the professional, friendly and cost-effective approach that is offered.
